DEDICATION

of the 1979 Florida Statistical Abstract is made to

CARTER C. OSTERBIND

in appreciation for:

--his conception of the idea for this publication

--his support of its editors and staff members as they produced each edition

--his outstanding leadership of the Bureau of Economic and Business Research of the College of Business Administration where he has served as its director 1960-1979

and with best wishes
for continued success in his work with the
Center for Gerontological Studies
in its new location in the
College of Liberal Arts and Sciences
University of Florida

TO THE READER

Florida can be conceived of as a system--complex, inter-related but open. This system comprises individuals, households, farms, business enterprises, governmental agencies, and associations of all kinds--cultural, political, recreational, religious, and social. These individuals and organizations may work independently, competitively, or cooperatively to sustain and improve the lives and livelihoods of Floridians.

The purposes of the Florida Statistical Abstract are to:

--describe the manifold dimensions of the Florida system in quantitative terms,

--measure the changes that have taken place over time,

--compare the economic and social attainments of sub-areas within the state: cities, counties, and metropolitan areas,

--indicate the relationship of Florida's activities to those in other states and in the nation as a whole.

Every effort is made to obtain and publish in the Abstract the most up-to-date information possible. However, because these data have been collected by many entities--state and federal, private and public--they may cover activities occurring in different periods of time. It is impossible to insure uniformity, but time periods are always stated in the tables.

When the statistics on some subject have not been updated at the time an edition of the Abstract is ready to go to press, they may not be repeated. The user is encouraged to utilize data in earlier editions. This is particularly true for census data.

The first part of the Abstract includes those tables that present information about the characteristics of the population: number of people, housing, health, education, income, employment, and welfare. The next three parts refer to establishments engaged in economic, social, and political activities.

Sections 9.00 through 23.00 present information about establishments rather than individuals. These establishments are classified by the type of activity in which they are engaged according to the Standard Industrial Classification (SIC). This system has been developed by the U.S. Office of Management and Budget of the Executive Office of the President and is published in the Standard Industrial Classification Manual, 1972. An establishment is defined in the Manual as "an economic unit generally at a single physical location where business is conducted, or where services or industrial operations are performed." An establishment is not necessarily identical with an enterprise or company which may consist of more than one establishment. Both profit making and not-for-profit organizations are included as well as agencies of the federal, state, and local governments. Major industries are assigned two digit SIC codes: 20 through 99; subdivisions are classified by three- and four-digit codes.

For example, the construction industry is divided into the major group, SIC 15, "building construction"; major group SIC 16, "construction other than building construction"; and major group SIC 17, "special trade contractors." Major group 15 is in turn divided into group 152--"general building contractors, residential buildings," group 153--"operative builders," and 154--"general building contractors, non-residential." Finally, group 152 is subdivided into industry number 1521--"general contractors, single family houses," and 1522--"general contractors, other than single-family."

The last section of the *Florida Statistical Abstract* contains exhibits of a comparative nature: economic and social trends. In Section 24.00 are a number of time series showing the fluctuations of such major economic activities as income and employment. Measures of the quality of life in the state and metropolitan areas are given in Section 25.00.

Fiscal years. In 1976 the federal fiscal year was changed to extend from October 1 of one year through September of the next. The fiscal year of the State of Florida is July 1 of one year through June 30 of the next. In a few cases where a reporting organization, particularly one of the Florida cities, has a different fiscal year, the months included are stated in the table.

Covered employment and payroll. A number of tables are composed of statistics relating to employment and payroll covered by the unemployment compensation law of Florida and the federal government. These data are supplied in unpublished form by the Office of Research and Analysis, Division of Employment Security, Department of Labor and Employment Security, State of Florida. Readers should keep in mind that some types of employees are not covered by the unemployment compensation law. An explanation of the limitations of these data is to be found in the introduction to Section 6.00.

Computer printouts of Abstract information. All tables in the *Florida Statistical Abstract* are on computer tapes; reproduction has been accomplished by computer activation of a composing machine. Any individual or organization desiring direct accessing of the data on the *Abstract* tape can make arrangements through the Bureau of Economic and Business Research.

Additional information. The sources of all data are listed at the bottom of each table in *Abstract*. Suggestions for locating these sources or obtaining more detailed information are made in the section at the end of the book entitled, "Guide to Sources of Statistics."

The preparation of this edition of the *Abstract* was shared by many members of the staff of the Bureau of Economic and Business Research. It can be truly said to be a group effort. Frances Terhune served as coordinator of staff activities and supervised the page layouts and graphics. Susan Floyd was responsible for the required statistical computations and for coding and auditing the data, assisted by statistical aides Mona Nieland, Donna St. Angelo, and David Schlottman and student assistants Kathleen Bragan, Gregg Buckingham, Steve Cook, Stephanie Daniels, Joy Haddocks, Belinda Harper, Archie Nelson, Waymond Norman, Michael Royer, and Scott Somerstein. Joann Werfel, Randy Forde, Daniel Mendicino, P. C. Padmanabhan, Bob Shields, and Peter Boylan participated in the search for and compilation of data. Evan Eldridge supervised data processing and created the computer maps. Teri Blunt was responsible for computer programming; Genevieve Floyd was the data processing coordinator, assisted by Maria Arevalo, Sabra Mallett, and Sharon Shannon. Nellie Widener supervised the keypunching of the data, assisted by Phyllis Lee, Deborah Egnatowich, and Sandra Molnar. Dorothy Evans and Donna Carman processed the chapter introductions and index. Janet Fitzpatrick, Saundry Harris, and Juanita Williams aided in the compilation of data. Mona Nieland prepared the page layouts; Richard Fichthorn and Sam Getz designed the cover.

We would be happy to receive suggestions for improving the usefulness of the *Florida Statistical Abstract* to you and your organization.

POPULATION

The primary component of the Florida system is its people. Without them Florida consists of a piece of land demarcated by natural and man-made boundaries. With them it becomes a politically, socially, and culturally organized body of persons. A person is considered to be an inhabitant of Florida if at the time a census is taken he or she claims a designated Florida community as his or her usual place of residence, that is where he or she "lives and sleeps most of the time." This place may not be the person's legal or voting residence or domicile, although it usually is.

It is the Census of Population taken once every ten years that provides the basic statistics about the population. The Census Bureau, which conducts this census, also takes counts of people in small areas at other times and frequently makes up-to-date estimates of the population and its characteristics. These estimates are found in Current Population Reports, P-Series. Annually the Population Division, Bureau of Economic and Business Research, University of Florida makes estimates of the population as of July 1 in each county and municipality and in the unincorporated areas. These are released under the title Florida Estimates of Population. Projections of the population in Florida counties and estimates of such demographic characteristics as age, race, sex, and housing are made and revised from time to time by the Population Division and published in Population Studies. The 1978 county and municipal figures shown in Section 1.00 were estimated independently for each county and municipality and aggregated. The resulting state figure has not been adjusted to conform to the state estimate made by the U.S. Bureau of the Census.

New information in this edition includes population characteristics by race and national origin and by duration of current residence from Current Population Reports of the Bureau of the Census, Series P-20, no. 334. The Population Division of the Bureau of Economic and Business Research has made projections of age groups in Florida through the year 2020. The U. S. Veterans Administration has published a monograph presenting data on the number of veterans by county which is abstracted herein. Persons interested in this topic should contact the Office of Research and Analysis of the Florida Division of Employment Security for a copy of their report on veterans in the population.

Definitions and Area Classifications. Persons in the armed services are counted as residents of the area in which their installations are located. College students are considered residents of the communities in which they reside while attending college.

Counties and municipalities are political entities, the boundaries of which are determined by legislative action. But from a sociological point of view the community of which a person considers himself or herself to be a part may not correspond to such a legal entity. Terms like "Greater Jacksonville" or "the Miami area" are used to indicate the real community. People do not hesitate to cross city or county limits or even state lines to buy or sell or to seek cultural, medical, recreational, or social services. For this reason the U.S. Bureau of the Census has designated communities known as standard metropolitan statistical areas (SMSAs).

The standard metropolitan statistical area is defined by the U.S. Bureau of the Census in two ways.

(1) An SMSA is "a county or group of counties which contains at least one city of 50,000 inhabitants or more or twin cities with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and culturally integrated with the central city."

(2) "A city of at least 25,000 inhabitants which together with those contiguous places (incorporated or unincorporated) having a population density of at least 1,000 persons per square mile, has a combined population of 50,000 and constitutes for general economic and social purposes a single community, provided that the county or counties that the city or cities are located in has a total population of at least 75,000 also constitutes a standard metropolitan statistical area."

It is on the basis of this second definition that the U.S. Bureau of the Census in 1977 designated Bradenton and Panama City to be SMSAs. A map showing the location of the standard metropolitan statistical areas in Florida is to be found just ahead of this section.

A region that is usually larger than an SMSA is the market region. As defined by the Bureau of Economic and Business Research of the University of Florida, a market region represents those counties from which a metropolitan area draws trade and in which its lending institutions make loans. A map of market areas is to be found in Section 1.00.

Agencies of the state government have designated various groups of counties as being parts of districts. The Department of Administration has developed eleven planning districts (map in Section 1.00). The counties were grouped together on the basis of common interests and needs for planning development in the area. There are also health districts which are enumerated on a map in Section 7.00, climatological districts (map in Section 8.00), crop districts (map in Section 9.00), and congressional districts.

HIGH		16.5	19.3	21.9	26.5	33.5

NOTE: STATE PROJECTIONS ARE BASED ON THREE DIFFERENT SETS OF ASSUMPTIONS REGARDING ANNUAL NET MIGRATION. THE HIGH PROJECTIONS ARE BASED ON THE LARGE MIGRATION LEVELS OF THE FIRST HALF OF THE 1970S WHEN MORE PEOPLE WERE MIGRATING TO FLORIDA THAN EVER BEFORE. THE LOW MIGRATION LEVELS ARE SIMILAR TO THOSE BETWEEN 1975 AND 1977 WHEN FLORIDA POPULATION GROWTH RATES WERE AMONG THE LOWEST SINCE WORLD WAR II. THE MEDIUM ASSUMPTIONS IMPLY ANNUAL NET MIGRATION LEVELS SIMILAR TO THE AVERAGE IN THE 1970S. COUNTY PROJECTIONS ARE BASED ON THE RATIO OF EACH COUNTY'S SHARE OF THE TOTAL STATE INCREASE FROM 1970-78. A MORE DETAILED DESCRIPTION OF THE METHODOLOGY CAN BE FOUND IN THE SOURCE.

1/ DIFFERENCES IN ESTIMATES OF THE PROPORTION OF PEOPLE 65 AND OVER FROM THOSE OF PREVIOUS YEARS MAY BE DUE TO IMPROVEMENTS IN METHODOLOGY AND SHOULD NOT BE USED AS PARTS OF TIME SERIES FOR INDIVIDUAL COUNTIES.

2/ THESE COUNTIES EXHIBITED CHANGES IN NET MIGRATION PATTERNS OF SUCH DEGREE THAT ESTIMATES FOR THEM SHOULD BE CONSIDERED LESS RELIABLE THAN THOSE FOR THE OTHER COUNTIES.

3/ INCORPORATES PRELIMINARY DATA FROM THE COUNTY'S RECENT SPECIAL CENSUS.

4/ DATA INCORPORATE INFORMATION COLLECTED IN SPECIAL CENSUSES SINCE 1970. CHANGES IN NET MIGRATION PATTERNS IN PASCO MAKE ITS ESTIMATE LESS RELIABLE THAN FOR OTHER COUNTIES.

NOTE: AGE BREAKDOWNS OF POPULATION FOR COUNTIES BY RACE AND SEX ARE AVAILABLE FOR A FEE FROM THE DIVISION OF POPULATION STUDIES, BUREAU OF ECONOMIC AND BUSINESS RESEARCH. THE ASSUMPTION THAT THE NET EFFECT OF MIGRATION ON THE AGE, RACE, AND SEX COMPONENTS OF A COUNTY'S POPULATION WAS SIMILAR BETWEEN 1970 AND 1978 TO THE CHANGE OBSERVED BETWEEN 1960 AND 1970 IS IMPLICIT IN THE METHODOLOGY USED TO COMPUTE THESE ESTIMATES. THE ACCURACY OF THE ESTIMATES IS DIRECTLY RELATED TO THE DEGREE TO WHICH THIS ASSUMPTION HOLDS FOR A GIVEN COUNTY.

HOUSING

Closely allied with the population is its housing. The decennial Census of Housing is taken simultaneously with the Census of Population and provides basic information about people in their living arrangements. Much of the detail from the census has been published in the Florida Statistical Abstract, 1972, 1973, and 1975 editions.

A housing unit is defined by the Bureau of the Census as a "group of rooms or a single room occupied or intended for occupancy as separate living quarters."

Data on low-rent housing, F.H.A., and urban renewal programs are supplied by the U.S. Department of Housing and Urban Development. Two agencies of the State of Florida also provide information. The Division of Motor Vehicles of the Department of Highway Safety and Motor Vehicles publishes annual totals of tags sold to owners of mobile homes and recreational vehicles. The Division of Hotels and Restaurants of the State Department of Business Regulation publishes statistics on apartment houses, rooming houses, and licensed lodgings. The data on housing for the elderly and jointly owned multi-family units is new this year and comes from Florida Department of Revenue's publication Florida Ad Valorem Valuations and Tax Data, 1978.

VITAL STATISTICS AND HEALTH

The Florida Department of Health and Rehabilitative Services is the principal source of vital statistics and morbidity statistics for Florida and its counties. Data are released on a monthly basis and later accumulated in two annual reports, Florida Vital Statistics and Florida Morbidity Statistics. The publications include comprehensive data on births, infant deaths, illegitimate births, deaths by cause, on marriages, divorces, annulments, and on notifiable diseases. The 1978 data published in the following section are provisional. Included for the first time are data on the number of abortions by county. Additional information on this subject is included from Abortion Surveillance, 1976, a report of the U.S. Department of Health, Education, and Welfare. It is well known that many notifiable diseases are incompletely reported, but the degree of under-reporting is not known. For births and deaths, resident is the term which indicates all births or deaths among residents of a specified area regardless of where the event occurred, while recorded is the term used to identify all births or deaths occurring in the specified area regardless of the usual residence of the person counted.

The Division of Mental Health of the Florida Department of Health and Rehabilitative Services publishes each year the Statistical Report of Hospitals containing information on admissions, discharges, and types of illnesses.

Information on health services establishments, employment, and payroll are found in Section 20.00.

4.00

EDUCATION

After housing and health, education becomes an important ingredient of a person's or a community's well-being. Data on the extent of popular education, the level achieved by the pupils, and the availability and enrollments of schools, colleges, and universities are included in Section 4.00. Employment and finances of educational institutions and services will be found in Section 20.00, Health, Education, and Cultural Services. Additional information on the public funding of education will be found in Section 23.00.

The principal sources of the basic information on education in Florida include *Profiles of Florida School Districts*, the annual report of the State Commissioner of Education, and other publications of the Department of Education. In Department of Education publications, *enrollment* refers to the cumulative number of pupils registered during a school year; *membership* is the number registered at one point in time.

Enrollments in public universities in the state are made available by the Division of Planning and Analysis of the University of Florida. Data on public community colleges have come from reports of the Division of Community Colleges of the Department of Education. Private college information is collected by and published in the annual report of the State Board of Independent Colleges and Universities.

Enrollment at Florida's traditionally black colleges and universities comes from a special study made by the National Center for Education Statistics of the U.S. Department of Health, Education, and Welfare. This agency also supplied new information on enrollments in institutions of higher education.

New this year is a table presenting data on educational attainment--the first since the 1970 Census. These data come from a 1976 Survey of Income and Education conducted by the U.S. Bureau of the Census. From the same source comes information on persons with non-English language backgrounds.

TABLE 4.05. EDUCATIONAL ATTAINMENT: PERSONS 18 YEARS OLD AND OVER BY YEARS OF SCHOOL COMPLETED IN FLORIDA, 1970 AND 1976

NOTE: DATA WERE OBTAINED FROM THE 1978 FALL STUDENT SURVEY, ESE 269. BECAUSE SOME HIGH SCHOOLS DO NOT HAVE A FORMAL FOLLOW-UP PROGRAM FOR GRADUATES, IT WAS NECESSARY FOR THE PRINCIPAL OR GUIDANCE COUNSELOR TO PREPARE ESTIMATES FOR SOME OF THE ITEMS INCLUDED. FIGURES INCLUDE TWELFTH GRADE GRADUATES FROM ADULT CENTERS AND EXCEPTIONAL AND GIFTED SCHOOLS.

INCOME AND WEALTH

Other important characteristics of the population are personal income and family income. The source for statistics on personal income in Florida is the U.S. Department of Commerce, Bureau of Economic Analysis from unpublished releases. The Bureau of Economic Analysis has made comprehensive estimates of personal income, by type and industrial source, covering all economic areas and standard metropolitan statistical areas (SMSAs) and counties in the nation for selected years from 1929 through 1977. Preliminary 1978 state totals are presented.

Personal income is defined as the current income of persons in an area from all sources. It is measured before deduction of income and other personal taxes, but after deduction of personal contributions to social insurance programs. It consists of wages and salaries (in cash and kind); various types of supplementary earnings, termed other labor income; the net incomes of owners of unincorporated businesses (farm and nonfarm with the latter including the income of independent professionals), termed proprietors income; net rental income, dividends, and interest, termed property income; and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently), termed transfer payments.

The labor and proprietary components of personal income are allocated on a place-of-work basis. These earnings are converted to a place-of-residence basis by means of a residence adjustment factor. Property income and transfer payments are then added to earnings, resulting in total income on a place-of-residence basis. The first basis, earnings by place of work, is useful in the analysis of the income structure of a given area in terms of industrial markets and purchasing power. Expressed on a per capita basis, the latter is an indicator of living standards and welfare level. The population estimates on which the per capita amounts are based are those of the U.S. Bureau of the Census and are not the estimates shown in the population section of this publication. See Section 9.00 for estimates of farm income for Florida and selected other states. Also included in that section are data on payments to farmers under the Agricultural Stabilization Program.

The U.S. Bureau of the Census estimates of per capita money income in Florida counties and municipalities for 1974 and 1975 are included in this Abstract. They were published in Current Population Reports, Series P-25, No. 748.

In 1976 the Bureau of the Census conducted a Survey of Income and Education. Data collected in this survey are available in public-use microdata form at the University of Florida Library and are being released in printed form in the Bureau of the Census Current Population Reports, Series P-60. Money income and poverty-level information from the survey appear on Tables 5.42, 5.43, and 5.44.

Information on income and federal income tax returns is made available by the U.S Department of the Treasury, Internal Revenue Service in Statistics of Income: Individual Income Tax Returns and Business Income Tax Returns. Tables which show distribution of income groups are based on those individuals who file income tax forms. It should be remembered that under the Tax Reform Act of 1969, many low-income people are not taxable and are not required to file.

Wealth is defined as all property that has a money value or an exchangeable value. It is measured as of one moment of time in contrast to income which can be thought of as a flow of value over a period of time. There are no estimates made of the total wealth of individuals and organizations in any community on a regular basis. There are, however, indicators of the value of holdings of various types. Industrial and commercial failures (Table 5.83) represent a loss of wealth. These data were collected by Dun and Bradstreet and published in the *Statistical Abstract of the United States*. The same source provides information on business receipts of proprietorships and partnerships, a form of income.

The wealth represented by ownership of real property can be estimated by its value assessed for tax purposes; see Table 20.67. Assets of and deposits in banks and savings and loan associations are other forms of wealth and are reported in Section 17.00.

TABLE 5.01. PERSONAL INCOME: TOTAL AND PER CAPITA AMOUNTS IN FLORIDA, 1963 THROUGH 1978

YEAR	TOTAL ($1,000,000)	PER CAPITA (DOLLARS)	YEAR	TOTAL ($1,000,000)	PER CAPITA (DOLLARS)

A/ REVISED.

NOTE: THESE ESTIMATES ARE BASED ON A MONEY INCOME CONCEPT. TOTAL MONEY INCOME IS DEFINED BY THE BUREAU OF THE CENSUS FOR STATISTICAL PURPOSES AS THE SUM OF WAGE AND SALARY INCOME, NET NONFARM SELF-EMPLOYMENT INCOME, NET FARM SELF-EMPLOYMENT INCOME, SOCIAL SECURITY AND RAILROAD RETIREMENT INCOME, PUBLIC ASSISTANCE INCOME, AND ALL OTHER INCOME SUCH AS INTEREST, DIVIDENDS, VETERANS' PAYMENTS, PENSIONS, UNEMPLOYMENT INSURANCE, ALIMONY, ETC. THE TOTAL REPRESENTS THE AMOUNT OF INCOME RECEIVED BEFORE DEDUCTIONS FOR PERSONAL INCOME TAXES, SOCIAL SECURITY, BOND PURCHASES, UNION DUES, MEDICARE DEDUCTIONS, ETC. DATA FOR 1969 ARE PUBLISHED IN TABLE 5.40 IN THE 1977 ABSTRACT.

SOURCE: U.S., DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS, CURRENT POPULATION REPORTS: POPULATION ESTIMATES AND PORJECTIONS. SERIES P-25, NO. 748.

TABLE 5.42. MONEY INCOME: PERCENTAGE DISTRIBUTION OF 1976 HOUSEHOLDS BY AMOUNT OF 1975 TOTAL MONEY INCOME IN FLORIDA, OTHER SPECIFIED AREAS, AND THE UNITED STATES

LABOR FORCE, EMPLOYMENT, AND EARNINGS

Economic welfare for most individuals and families depends upon employment. The basis of statistics on the employment status of the population is a monthly Current Population Survey conducted by the U.S. Bureau of the Census. Employed persons are defined in the Handbook of Labor Statistics as comprising "all those who, during the survey week, worked at all as paid employees, in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers in an enterprise operated by a family member" and all those temporarily absent from their jobs due to such factors as illness or vacation.

Unemployed persons are defined as those "who did not work during the survey week, who made specific efforts to find a job within the previous four weeks and who were available to work during the survey week except for temporary illness."

The civilian labor force is made up of all civilians classified as employed or unemployed. The unemployment rate is the number of unemployed expressed as a percentage of the civilian labor force. Persons 16 years of age and over not classified as employed or unemployed are counted as not in the labor force.

The Office of Research and Analysis, Division of Employment Security, the Department of Labor and Employment Security of the State of Florida has the responsibility of preparing these estimates following procedures developed in cooperation with the U.S. Bureau of Labor Statistics. It publishes monthly information about Florida in Florida Employment Statistics and about standard metropolitan statistical areas and five small counties in Labor Market Trends; special releases are issued on the other small counties. Different samples are used to prepare these three sets of employment and unemployment estimates.

The U.S. Bureau of Labor Statistics compiles statistics and publishes data on nonagricultural employment in Florida and its standard metropolitan statistical areas (SMSAs). Its publications include Employment and Earnings: States and Areas, State Profile of Employment and Unemployment, and the Handbook of Labor Statistics. Another source of data on employment is the decennial Census of Population conducted by the U.S. Bureau of the Census.

Statistics on agricultural employment are made available by the Florida Crop and Livestock Reporting Service.

Tables of covered employment and payroll are presented in sections of this Abstract devoted to individual industries and nonprofit organizations. Any such firm or nonprofit establishment whose employees are covered by state and federal unemployment laws must submit monthly reports (ES-202) on the number of persons on its payroll and the amount they were paid so that the appropriate tax can be computed and collected. The data this generates provide useful measurements of the impact of various kinds of industries, firms, or other organizations on the economies of the state and counties. The Office of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security compiles these statistics. In these reports the number of reporting units is the average for the quarter, employment is for the week of the 12th in the specified month, and payroll is for the entire quarter.

It should be borne in mind that covered employment data are not as complete as those of the U.S. Census of Business since certain workers are specifically excluded from coverage. These are principally railroad and some agricultural, local government, and domestic employees and self-employed workers. Also excluded are most nonprofit organizations with fewer than four employees. Included among the self-employed are such types of persons as insurance or real estate agents and barbers whose remuneration is solely by way of commissions. Beginning with January 1, 1978 coverage of the Florida Unemployment Compensation Law was extended to include (1) employees of agricultural establishments in SIC industries 01, 02, and 07 that meet minimum employment and payroll standards, (2) employees of nonprofit schools, SIC industry code 821, (3) domestic workers for employees reporting payrolls of at least $1,000 a quarter, SIC code 881, and (4) public service employees whose positions are funded through contract with CETA (Comprehensive Employment and Training Act) prime sponsors. These would be mostly in SIC codes 80, 82, 83, 86, and 91.

Also missing from the tables are categories for the state or counties in which there were no firms or so few units that the information for an individual establishment might be made public or estimated by competitors. In several tables ranges have been substituted for total amounts to avoid disclosure but give some idea of the magnitudes involved.

The derivation and meaning of SIC codes are discussed in the preface of this Abstract. Table 6.12 presents data for all covered employees by industry and Table 6.13 by county.

Detailed employment data for governments can be found in Section 23.00.

SOCIAL INSURANCE AND WELFARE

In this section are data related to government programs for old-age, survivors, disability, and health insurance; and public assistance.

Old-age, survivors, disability, and health insurance--popularly referred to as social security--provides monthly cash benefits to retired or disabled insured workers and their dependents and to the survivors of an insured worker. The source of statistics on these programs is the U.S. Department of Health, Education, and Welfare and the Social Security Administration in the Social Security Bulletin, published monthly and in special reports.

The U.S. Department of Health, Education, and Welfare, Social Security Administration publishes data on state programs. Workmen's compensation provides protection against work-connected injuries and deaths. Data on this program are published periodically in the Social Security Bulletin.

Four public assistance programs--for the aged, the blind, the permanently and totally disabled, and dependent children--are administered by the state but are financed in part by the federal government in grants to states under the Social Security Act. The principal source of state and national data on these programs is the U.S. Department of Health, Education, and Welfare. The principal source of data on Florida and Florida's counties is the Florida Department of Health and Rehabilitative Services, Annual Statistical Report.

Information about state assistance are also reported in the Annual Report of the Comptroller, Table 23.50.

TABLE 7.10. OLD-AGE, SURVIVORS, DISABILITY, AND HEALTH INSURANCE: NUMBER OF BENEFICIARIES WITH MONTHLY CASH BENEFITS IN CURRENT-PAYMENT STATUS BY AGE RACE, AND SEX IN FLORIDA, DECEMBER 31, 1975, 1976, AND 1977

CHARACTERISTIC	1975	1976	1977
TOTAL NUMBER OF BENEFICIARIES	1,656,372	1,735,997	1,845,467
AGE OF BENEFICIARY			
21 YEARS AND UNDER	176,635	180,101	186,797
22-59 YEARS	124,926	133,644	146,621
60-64 YEARS	205,444	215,372	231,683
65-71 YEARS	540,285	561,190	592,752
72 YEARS AND OVER	609,082	645,690	687,614
RACE OF BENEFICIARY			
WHITE	1,496,353	1,569,476	1,669,796
BLACK	156,899	162,905	171,184
OTHER	3,120	3,616	4,487
SEX OF BENEFICIARY OTHER THAN CHILDREN			
MALE	627,932	659,270	705,488
FEMALE	842,495	886,513	942,131

NOTE: DATA REFER TO BENEFICIARIES WITH FLORIDA AS STATE OF RESIDENCE.

TABLE 7.11. OLD-AGE, SURVIVORS, DISABILITY, AND HEALTH INSURANCE: NUMBER OF RETIRED WORKERS AND AVERAGE MONTHLY AMOUNT OF BENEFITS OF RETIRED WORKERS IN CURRENT-PAYMENT STATUS IN FLORIDA, DECEMBER 31, 1975, 1976, AND 1977

ITEM	1975	1976	1977
NUMBER OF RETIRED WORKERS 1/	974,527	1,027,146	1,094,328
AVERAGE MONTHLY AMOUNTS OF BENEFITS (DOLLARS)	209.21	226.59	244.64
PERCENTAGE OF BENEFICIARIES RECEIVING--	100.0	100.0	100.0
$124.90 AND UNDER	15.8	12.3	9.8
$125.00-$149.90	9.9	8.9	7.3

3/ CASH AND MEDICAL BENEFITS PAID BY SELF-INSURERS, PLUS THE VALUE OF MEDICAL BENEFITS PAID BY EMPLOYERS CARRYING WORKMEN'S COMPENSATION POLICIES THAT DO NOT INCLUDE THE STANDARD MEDICAL COVERAGE. ESTIMATED FROM AVAILABLE STATE DATA.

SOURCE FOR TABLES 7.58 AND 7.59: U.S., DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, SOCIAL SECURITY ADMINISTRATION, SOCIAL SECURITY BULLETIN, MARCH 1979, AND PREVIOUS EDITIONS. 1977 DATA ON TABLE 7.59 FROM PREPUBLICATION RELEASE.

8.00

GEOGRAPHY AND CLIMATE

Florida, the people, are contained in Florida the land with its variety of elevations, water surfaces, vegetation, and animal life. Basic, too, to the quality of life and the economy of the state are such aspects of climate as temperature, length of season, and rainfall. These are the environmental factors described in Section 8.00.

Political subdivisions are described in the introduction to Section 1.00, Population. In this section the natural phenomena are, to the extent possible, related to cities and/or counties.

Two divisions of the U.S. Department of Commerce are the source of several of the tables in this section. These are the Bureau of the Census and the Environmental Data Service, whose publication is entitled Climatological Data, Florida, (monthly and annual). The Bureau of the Census issued Area Measurement Reports as a part of the 1960 Census of Population.

Other federal agencies are the Geological Survey and the National Oceanic and Atmospheric Administration. Information pertaining to the ownership of land in Florida by the federal government came from the Bureau of Land Management of the U.S. Department of the Interior.

New this year is a table showing the level of air pollution in the metropolitan areas of Florida. The Pollutant Standard Index (PSI) is part of a federal program to develop standard measures for the entire country. The Florida agency is the Bureau of Air Quality Management of the Department of Environmental Regulation.

1/ FIGURES FOR TOTAL AREA HAVE BEEN ROUNDED.

NOTE: SEE FOOTNOTES "1" AND "2" TO TABLE 8.01 FOR DEFINITIONS OF "LAND AREA" AND "INLAND WATER AREA." THE AREA GIVEN IN THE SOURCE QUOTED HERE, FOR THE SAME GEOGRAPHIC UNIT MAY DIFFER FROM THOSE SHOWN IN TABLE 1.75 FOR THE REASONS STATED IN THE NOTE TO THAT TABLE. THE AREAS SHOWN ABOVE WERE DETERMINED BY A UNIFORM METHOD AND ARE BELIEVED TO BE MORE DEPENDABLE THAN THOSE PUBLISHED AS PART OF THE REGULAR CENSUSES OF POPULATION WHICH ARE SUPPLIED BY LOCAL OFFICIALS.

SOURCE: U.S., DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS, 1960 AREA MEASUREMENT REPORTS: AREAS OF FLORIDA.

TABLE 8.24. FEDERAL LANDS: LAND OWNED BY THE FEDERAL GOVERNMENT BY AGENCY IN FLORIDA AND THE UNITED STATES, JUNE 30, 1975

AGRICULTURE

Agriculture, of all the industries, comes first not only because it is the oldest but because it is the most dependent on nature. Its direct contribution to the income and employment of Floridians is relatively small, but its indirect contribution through support industries and manufacturing is great indeed. Data on farm income is presented in Section 5.00 with income data from other sources.

Data on agriculture consist of information about farms and farming. The definition of a farm used for the 1959, 1964, and 1969 censuses is as follows: any place from which $250 or more of agricultural products are sold, or normally would have been sold, during the census year, or any place of 10 acres or more from which $50 or more of agricultural products were sold, or normally would have been sold, during the census year. The census definition of a farm, for purposes of publishing the 1974 final census data, was changed: any place which, during the census year, had or normally would have had sales of agricultural products of $1,000 or more.

The final reports of the 1974 Census of Agriculture are the principal sources of data herein relating to the number, acreage, value, and ownership of farms; land utilization; and production and value of farm products. Greater timeliness and detail are provided in tables based on annual publications of the U.S. Department of Agriculture: Agricultural Outlook, Agricultural Statistics, State Farm Income Estimates, and other publications. Two additional sources are the Crop and Livestock Reporting Service, Orlando, and the Agricultural Experimental Station at the University of Florida, Gainesville.

When comparisons are made between Florida and other states, the other states selected either have a similar climate (the southern tier of sunbelt states) or produce similar crops (citrus in Arizona and California, sugar cane in Hawaii and Louisiana, eggs in Alabama and Mississippi, etc.).

Data on agricultural industries come from the Florida Department of Labor and Employment Security. Industries classified 07 by the SIC code are included. These are establishments primarily engaged in performing soil preparation services, crop services, veterinary services, other animal services, farm labor and management services, and landscape and horticultural services for others on a fee or contract basis. Self-employed persons, farm workers, and domestic service workers are specifically excluded. Note recent changes in the coverage described in the introduction to Section 6.00.

Data on some of the financial aspects of the industry come from the Agricultural Stabilization and Conservation Service's Annual Report.

New material this year includes information about commercial dairy production and acreage devoted to citrus cultivation from the Florida Crop and Livestock Reporting Service. Also there are data on the consumption of fertilizers from the State Department of Agriculture and estimates of county farm income prepared by the Department of Food and Resource Economics of the Institute of Food and Agricultural Sciences, University of Florida.

A/ EMPLOYMENT FOR THE WEEK INCLUDING THE 12TH.

1/ REPORTING UNITS WITHOUT A FIXED LOCATION WITHIN THE STATE OR OF UNKNOWN COUNTY LOCATION.

NOTE: DETAIL MAY NOT ADD TO TOTALS BECAUSE OF OMISSION OF COUNTIES WHERE DATA WOULD DISCLOSE INFORMATION ABOUT INDIVIDUAL FIRMS. THE DATA FOR THESE COUNTIES ARE INCLUDED IN THE FLORIDA TOTAL. THREE-DIGIT CLASSIFICATIONS OF INDUSTRIES INCLUDED IN THIS TWO-DIGIT GROUP ARE LISTED IN TABLE 9.14. EFFECTIVE JANUARY 1, 1978 THE FLORIDA UNEMPLOYMENT COMPENSATION LAW NOW COVERS EMPLOYEES OF AGRICULTURAL ESTABLISHMENTS HAVING TEN OR MORE EMPLOYEES FOR AT LEAST TWENTY WEEKS DURING THE YEAR, OR REPORTING AT LEAST $20,000 IN PAYROLL FOR ONE QUARTER (SIC CODES 01, 02, AND 07).

SOURCE: STATE OF FLORIDA, DEPARTMENT OF LABOR AND EMPLOYMENT SECURITY, DIVISION OF EMPLOYMENT SECURITY, OFFICE OF RESEARCH AND ANALYSIS, ES-202 DATA.

A/ REVISED.

B/ PRELIMINARY.

1/ INCLUDES EARLY, MIDSEASON, AND LATE TYPE (VALENCIA) ORANGES.

2/ ARIZONA, CALIFORNIA, FLORIDA, AND TEXAS.

NOTE: CHARGES FOR PICKING, HAULING, AND PACKING ARE DEDUCTED FROM THE WEIGHTED AVERAGE OF PRICES OBTAINED FROM ALL SEGMENTS OF THE CITRUS INDUSTRY TO ARRIVE AT THE FINAL ON-TREE PRICE RECEIVED BY PRODUCERS. SOME HISTORICAL DATA HAVE BEEN REVISED.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF AGRICULTURE, FLORIDA CROP AND LIVESTOCK REPORTING SERVICE, FLORIDA AGRICULTURAL STATISTICS: CITRUS SUMMARY, 1978.

FORESTRY, FISHERIES, AND MINERALS

In addition to agriculture other basic industries in which people work closely with nature to develop resources and production are forestry (SIC code 08), fisheries (SIC code 09), and mining (SIC codes 10 through 14).

The American Forest Institute provides data on tree farms. Employment and payroll data come from the Florida Department of Labor and Employment Security, as does similar information for fisheries and mining. See the introduction to Section 6.00.

The National Marine Fisheries Services of the U.S. Department of Commerce provides data on fish landings and fishery products, plants, and cooperatives. Data on fish kills are provided by the U.S. Environmental Protection Agency.

Basic data on the production of minerals are from preprints of the Minerals Yearbook and specific industry reports of the Bureau of Mines of the U.S. Department of Interior.

The State Energy Office in the Florida Department of Administration issues Florida Energy Resources, September 1978.

Some additional data on natural gas and petroleum production are in the Energy Section.

1/ LANDINGS IN INTERIOR WATERS ESTIMATED.

NOTE: STATISTICS ON LANDINGS ARE SHOWN IN ROUND (LIVE) WEIGHT FOR ALL ITEMS EXCEPT UNIVALVES AND BIVALVE MOLLUSKS SUCH AS CLAMS, OYSTERS, AND SCALLOPS WHICH ARE SHOWN IN WEIGHT OF MEATS EXCLUDING THE SHELL. DATA ARE PRELIMINARY AND DO NOT INCLUDE LANDINGS BY U.S. FLAG VESSELS AT PUERTO RICO OR OTHER PORTS OUTSIDE THE 50 STATES. DATA DO NOT INCLUDE PRODUCTION OF ARTIFICIALLY CULTIVATED FISH AND SHELLFISH.

CONSTRUCTION

In this section are statistics on building construction activity and characteristics of the industry (SIC codes 15-17). The principal source of construction data for Florida is the Bureau of Economic and Business Research, University of Florida, in its several publications. The Bureau publishes monthly and annual summary information on the type and value of building permits for construction issued by administrative offices in each of approximately 430 places in Florida, in Building Permit Activity in Florida. Additional sources of data on construction in the various states are reports available from F.W. Dodge Company, a division of McGraw-Hill, Inc.; the Construction Review, published monthly by the U.S. Department of Commerce; and Construction Reports: Building Permits, published by the U.S. Bureau of the Census.

Information on the construction industry such as receipts, employment, and value added from the 1972 Census of Construction Industries were published in the 1976 Florida Statistical Abstract. Data on employment and payrolls are supplied by the Florida Department of Labor and Employment Security, as described in the introduction to Section 6.00.

New this year is a table showing the assessed value of new construction from data supplied by the Florida Department of Revenue: Florida Ad Valorem Valuation and Tax Data, 1978.

MANUFACTURING

The natural products of the farms, forests, fisheries, and mines are transformed into new products by the manufacturing industry. A manufacturing establishment, as defined by the U.S. Bureau of the Census, usually consists of a single physical location at which this transformation is performed. Traditionally economists have referred to manufacturing as the creation of form utility. Major industry divisions comprise SIC codes 20-39.

Data on the number of units, number of employees, and payroll for 1978 are published herein. These were obtained from the Office of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security.

New tables for this year are those relating to the export of manufactured goods from Florida. These data are from the 1976 Annual Survey of Manufacturing.

The U.S. Bureau of the Census conducts a complete count of manufactures every five years and a sample survey in intervening years. Preliminary data from the 1977 Census were not available in time to be included in this edition of the Abstract. The Bureau of Economic and Business Research will publish a summary of the information relative to Florida counties and industries when it becomes available. Persons who would like to receive an announcement of this publication should send their name and address to 221 Matherly Hall, University of Florida, Gainesville 32611. Meanwhile data on manufacturing from previous censuses and surveys will be found in earlier editions of the Florida Statistical Abstract.

Another source of such information is the 1979 Survey of Industrial Purchasing Power, published by Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

TRANSPORTATION

The principal sources of information about railroads (SIC 40) are the Public Service Commission of the State of Florida, the *Yearbook of American Railroad* published by the Association of American Railroads, and the Florida Department of Revenue.

Employment and payroll figures for all modes of transportation except railroads are supplied by the Florida Department of Labor and Employment Security. Railroads are not included because their employees are not covered by the same unemployment law as workers in other industries.

The U.S. Department of Transportation provides data on roads and highways, tax receipts, and vehicles in *Highway Statistics*, a publication of the Federal Highway Administration. Information about licenses and drivers of motor vehicles comes from the Florida Department of Highway Safety and Motor Vehilcles. The same source publishes *Traffic Accident Facts*.

Water transportation (SIC 44) includes both the movement of vessels through Florida waterways and the volume of commodities shipped into and out of Florida ports. The authorities of the various ports in the state have supplied data on their activities.

Air transportation (SIC 45) is represented by data showing exports and imports obtained from *U.S. Airborne Exports and General Imports*, published by the Bureau of the Census of the U.S. Department of Commerce. Air traffic information comes from two sources developed by the Federal Aviation Administration of the U.S. Department of Transportation: *FAA Air Traffic Activity* and *Airport Activity Statistics of Certified Route Air Carriers*.

International movements of aircraft are reported in the *Annual Report on the State of Finances*, U.S. Secretary of the Treasury.

TABLE 13.16. ROADS AND STREETS: LENGTH IN MILES AND KILOMETERS BY TYPE OF SYSTEM IN FLORIDA, DECEMBER 31, 1977

COMMUNICATIONS

Newspaper publishing and other print media (SIC 27) are considered to be manufacturing by the U.S. Bureau of the Census as well as the Office of Management and Budget, which establishes the Standard Industrial Classification. But since newspapers, periodicals, and books compete with electronic media in providing communications, data are repeated in this section.

Also included in Section 14.00 are data on the U.S. Postal Service (SIC 43), telephones (SIC 481), telegraph (SIC 482), and radio and television broadcasting (SIC 483).

Sources include the Florida Press Association, the Florida Broadcast Association, the U.S. Postal Service, the Florida Public Service Commission, and the Federal Communication Commission. Employment and payroll data are from the Florida Department of Labor and Employment Security, Division of Employment Security, Office of Research and Analysis. In two tables dealing with employment and payroll, ranges have been substituted for total amounts in order to avoid disclosure of information about individual establishments.

Two copyrighted sources have been used with permission: Editor and Publisher International Yearbook for newspaper circulation, and Broadcasting magazine for radio and television broadcast revenues.

TABLE 14.02. POSTAL RECEIPTS: ZIP CODES AND NET REVENUE OF FIRST CLASS POST OFFICES IN FLORIDA, FISCAL YEAR 1977-78

POWER AND ENERGY

Energy is an industry (SIC code 49) and also a national concern. Data in this section have been selected to describe the status of the electric, gas, and sanitary service industries, and the consumption of electricity, gas, gasoline, and fuel oil.

A major source of data on both aspects of the energy situation in Florida is Statistics of the Florida Electric Utility Industry, previously published by the State Energy Office of the Department of Administration of the State of Florida and now published by the Florida Public Service Commission. The Energy office issues Forecasts of Energy Consumption in Florida and Monthly Florida Gasoline Consumption. New this year are data on gasoline consumption by planning district. The Division of Employment and Security of the State Department of Labor and Employment Security supplies information on employment and payrolls in the utility industry.

The Public Service Commission of Florida also supplies data on typical gas bills, generating capacity, and average consumption of electricity. Typical electric bill information comes from the U.S. Federal Power Commission.

Consumption of motor fuel data are obtained from the publication Highway Statistics of the Federal Highway Administration, the Florida Department of Revenue, and the Annual Report of the Comptroller, State of Florida.

The Florida Electric Power Coordination Group provides the data on demand and supply conditions in the electric utility industry in the state.

1/ A CAPACITY OF 580,000 MEGAWATTS FROM A COMBINED CYCLE PRIME MOVER IS NOT LISTED SEPARATELY BUT IS INCLUDED IN THE TOTALS.

NOTE: NAME PLATE GENERATING CAPACITY IS THE FULL-LOAD CONTINUOUS RATING OF A GENERATOR, PRIME MOVER, OR OTHER ELECTRICAL EQUIPMENT UNDER SPECIFIED CONDITIONS AS DESIGNATED BY THE MANUFACTURER. IT IS USUALLY INDICATED ON A NAME PLATE ATTACHED MECHANICALLY TO THE INDIVIDUAL MACHINE OR DEVICE. A MEGAWATT IS 1,000 KILOWATTS.

SOURCE: STATE OF FLORIDA, PUBLIC SERVICE COMMISSION, STATISTICS OF THE FLORIDA ELECTRIC UTILITY INDUSTRY, 1960 THROUGH 1977, PREPUBLICATION RELEASE. FORMERLY PUBLISHED BY STATE ENERGY OFFICE.

WHOLESALE AND RETAIL TRADE

Basic classifcations in these fields as determined by the U.S. Bureau of the Census place business establishments into three groups: (1) wholesale trade--establishments primarily engaged in selling merchandise to retailers, to institutions, to industrial, commercial, and professional users, or to other wholesalers; (2) retail trade--businesses primarily engaged in selling merchandise for personal, household, or farm consumption; and (3) selected services--establishments primarily engaged in rendering a wide variety of services to individuals and business establishments. Data referring to wholesale and retail trade (SIC 50-59) are located in Section 16.00. Data on services will be found in Sections 18.00, 19.00, and 20.00.

The economic censuses taken every five years provide the benchmark data on wholesale and retail trade, analyzed by kind of business and county. The reader is referred to the tables in the Florida Statistical Abstract, 1974 and 1975 editions, for these breakdowns. New censuses of retail trade and wholesale trade were taken in 1977. However, data were not available in time to be included in this 1979 Florida Statistical Abstract. Interested readers should write to the Bureau of Economic and Business Research, 221 Matherly Hall, Gainesville 32611 to inquire about later publication.

Covered employment and payroll information by kind of business and county for March 1978 are included herein. These come from the Office of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security; see the introduction to Section 6.00. Since there are some differences in coverage and classification, these figures are not necessarily comparable with those from the business censuses.

The Florida Department of Revenue is the source for information on sales reported by firms in connection with the sales and use tax laws. In addition to the tables presented in this section, printouts of county gross and taxable sales by business category are available from the Bureau of Economic and Business Research on a subscription basis. These also vary in coverage and classification from either the census or the Department of Commerce figures. Data on retail sales tax collections may be found in Table 23.43.

The U.S. Bureau of the Census is responsible for the monthly data on department store sales.

FINANCE, INSURANCE AND REAL ESTATE

Industries covered in this section are those SIC codes numbered 60 through 67, including banking and other credit agencies, establishments dealing in securities and commodities, insurance and real estate offices, and holdings and investment firms.

Banks in Florida are organized under both Florida law and federal law. State-chartered banks are supervised by the Comptroller of the State of Florida and "national" banks, organized under federal law, are supervised by the Comptroller of the Currency of the United States.

Summaries of banking data for Florida may be found in the Annual Report of the Florida Division of Banking. The U.S. Federal Deposit Insurance Corporation (FDIC) publishes detailed data on banking in the United States and in the several states in Assets and Liabilities: Commercial and Mutual Savings Banks. In the FDIC reports, the number of banks, other than national, may not agree with the number shown by the Florida Comptroller. The FDIC's chief criterion is the provision of deposit facilities for the general public; however, trust companies engaged in general fiduciary business, though not in deposit banking, are included. Data on banking activity in Florida and Florida counties are compiled by Florida Bankers Association, Orlando, and, with their cooperation, are available from the Bureau of Economic and Business Research. The figures on number of units, employment, and payroll come from the Florida Department of Labor and Employment Security, Division of Employment Security. See the introduction to Section 6.00.

Sources of information on savings and loan associations include the Annual Report and monthly Trends published by the Florida Savings and Loan League.

The Florida Credit Union League pubishes the Credit Union Statistical Yearbook, which is the source of data on credit unions. The Florida Office of the Comptroller issues an Annual Report: Florida Chartered Credit Unions.

A basic source of information on activities on insurance companies in Florida is the Annual Report of the Florida Department of Insurance, Office of State Treasurer and Insurance Commissioner. A source of information on the United States and for individual states is the Life Insurance Fact Book, published annually by the American Council of Life Insurance. Another source is Insurance Facts, published by the Insurance Information Institute. Data on health insurance are from the Health Insurance Institute: Source Book of Health Insurance Data.

New this year are data on mortgage loans made in Florida and major metropolitan areas. These were compiled by the U.S. Federal Home Land Bank Board, Office of Economic Research.

TABLE 17.07. COMMERCIAL BANKS AND BRANCHES: OFFICES BY TYPE OF CHARTER IN FLORIDA AND THE UNITED STATES, DECEMBER 31, 1970 THROUGH 1977

PERSONAL AND BUSINESS SERVICES

Services are performed by business and nonprofit establishments for individuals, business firms, government agencies, and nonprofit organizations. They differ from trade in that no tangible product changes hands. The Office of Management and Budget classifies services as personal (SIC code 72), business (SIC code 73), auto repair services and garages (SIC code 75), miscellaneous services (SIC code 76), and services not elsewhere classified (SIC code 89).

The U.S. Bureau of the Census has collected data on services as part of its program of economic censuses for many years. It refers to them as Selected Services. These data are widely used by market analysts but do not include all the various types of services in the Standard Industrial Classification System. Tables of information on Selected Services are to be found in the Florida Statistical Abstract for 1975. A new census of services was taken for 1977; as is true for manufacturing and trade, data on services from the 1977 Census were not ready in time for inclusion in this edition of the Abstract. The Bureau of Economic and Business Research plans to publish a report of the major findings later this year. For information write 221 Matherly Hall, University of Florida, Gainesville 32611.

Data on establishments, employment, and payrolls of service establishments whose employees are covered by the unemployment insurance law are provided by the Division of Employment Security of the Florida Department of Labor and Employment Security; see the introduction to Section 6.00. Data for the same area and industry from the Census of Selected Services are not necessarily comparable because of differences in procedures, definitions, and establishments covered.

TOURISM AND RECREATION

Tourism is widely regarded as one of Florida's major economic activities. Indeed it is but, unfortunately for students of the state's economy, there is no such thing as a tourist industry. There are many firms in a number of different industries which derive a greater or lesser proportion of their receipts or sales from tourists. A person wanting to construct a model of tourism for Florida must put together a structure from many bits and pieces. The editors have attempted to bring together in Section 19.00 a number of these bits and pieces, leaving it to the reader to utilize them as he or she sees fit.

The Division of Tourism of the Florida Department of Commerce issues quarterly and county reports of tourist information and an annual report, Executive Summary: Florida Tourist Study. Tourist facilities include hotels, motels, and food service establishments which are regulated by the Division of Hotels and Restaurants of the Florida Department of Business Regulation. The Florida Revenue Department provides information on the sales of tourist-related businesses.

New this year are data on boats registered by county in Florida provided by the Department of Natural Resources, Division of Recreation and Parks. This agency also provides information as to the nature, size and popularity of state parks and memorials. Data on national parks in Florida come from the National Park Service of the U.S. Department of the Interior.

HEALTH, EDUCATION AND CULTURAL SERVICES

Data in this section are to be differentiated from those in Section 3.00: Vital Statistics and Health, and Section 4.00: Education, in that here the concern is with the establishments and employees who perform the included services and the financial aspects involved. In the above sections the concern is with the availability of services to the people of Florida and their utilization of them.

Services covered herein are medical and health (SIC code 80), educational (SIC code 82), and museums, botanical and zoological gardens (SIC code 84).

Data on employment are from the covered employment and payroll figures supplied by the Office of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security. The number of scientists and engineers was compiled as part of a special study made by the U.S. National Science Foundation and reported in the *Statistical Abstract of the United States*.

Information on licensed health service practitioners and professionals comes from the Cooperative Health Statistics System in the Office of Health Planning and Develpment in the Florida Department of Health and Rehabilitative Services. Another source is *Health Resources Statistics* published by the National Center for Health Statistics of the U.S. Department of Health, Education, and Welfare.

Bed capacity of licensed hospitals and nursing homes is reported by the Office of Licensure and Certification in the Florida Department of Health and Rehabilitative Services. Hospital data is also reported by the National Center for Health Statistics in *Hospitals: A County and Metropolitan Area Data Book*.

Educational establishment information comes from the Florida Department of Education: the annual report of the Commissioner of Education, *Profiles of Florida School Districts*; the Division of Community Colleges of the Florida Department of Education, *Report for Florida Community Colleges*; the Division of Public Schools, *MIS Statistical Briefs* and *MIS Statistical Reports*; State Board of Independent Colleges and Universities, *Annual Report*; and the National Center for Educational Statistics of the U.S. Department of Health, Education and Welfare. Another source, for the budget of the State University System, is the *State University System Legislative Summary*.

Library information is supplied by the Division of Library Services of the Florida Department of State.

For the first time tables are included in this section which present data on public health expenditures. The source is the Association of State and Territorial Health Offices. Also new in 1979 is information on regional planning agencies from the 1977 Census of Governments and estimates of employment in religious organizations prepared by the Office of Research and Analysis, Division of Employment Security, Florida Department of Labor and Employment Security.

New data on veterans hospitals comes from the United States Veterans Administration.

GOVERNMENTS AND ELECTIONS

Types of local government units and characteristics of the population of voting age are the subject of this section. The first seven tables are from the 1977 Census of Governments. These include numbers and characteristics of local governmental units in Florida. Detail regarding county, municipal, and special districts are presented in the *Abstract* for the first time.

The Division of Elections in the Florida Department of State provides information on registered voters and numbers of votes cast. Current figures on voting age population are released annually by the Bureau of Economic and Business Research, University of Florida.

The U.S. Bureau of the Census periodically issues a *Congressional District Data Book*. The Bureau of the Census defines each of the different types of local government units as follows.

A *county* is an organized local government authorized and designated by a state's constitution or statutes.

A *municipality* is a political subdivision within which a municipal corporation has been established to provide general local government for a specific population concentrated in a defined area. In Florida they are called cities, towns, and villages and have been established either by special acts of the legislature or by general law.

A *school district* is an entity providing local public schools. There is an independent school district in each county in Florida and twenty-eight community college districts.

A *special district* has been established to perform one or more specific functions dealing with natural resources, housing, urban renewal, hospital, fire protection, libraries, or public transit. About one-third of the special districts in Florida have taxing power.

TABLE 21.01. LOCAL GOVERNMENTS: NUMBER AND PERCENTAGE CHANGE IN FLORIDA, 1942 THROUGH 1977

YEAR	NUMBER	PERCENTAGE CHANGE	YEAR	NUMBER	PERCENTAGE CHANGE
1942 A/	503	(NA)	1967	828	8.2
1952	617	22.7	1972	866	4.6
1957	672	8.9	1977	912	B/ 5.3
1962	765	13.8			

A/ FIGURES ARE BASED ON LESS INTENSIVE AND DETAILED SURVEY EFFORTS AND ARE SUBJECT TO LIMITATIONS OF COMPARABILITY.

B/ PERCENTAGE CHANGE 1967 TO 1977 IS 10.1 PERCENT. AVERAGE FOR THE UNITED STATES FOR THE SAME PERIOD IS -1.7 PERCENT.

NOTE: DATA INCLUDE THE STATE GOVERNMENT AND ALL TYPES OF LOCAL GOVERNMENTS--COUNTIES, MUNICIPALITIES, TOWNSHIPS, SCHOOL DISTRICTS, AND SPECIAL DISTRICTS.

1/ THESE COUNTIES EXHIBITED CHANGES IN NET MIGRATION PATTERNS OF SUCH DEGREE THAT ESTIMATES FOR THEM SHOULD BE CONSIDERED LESS RELIABLE THAN THOSE FOR THE OTHER COUNTIES.

2/ DATA INCORPORATE INFORMATION COLLECTED IN SPECIAL CENSUSES SINCE 1970. CHANGES IN NET MIGRATION PATTERNS IN PASCO MAKE ITS ESTIMATE LESS RELIABLE THAN FOR OTHER COUNTIES.

3/ INCORPORATES PRELIMINARY DATA FROM THE COUNTY'S RECENT SPECIAL CENSUS.

NOTE: AGE BREAKDOWNS OF POPULATION FOR COUNTIES BY RACE AND SEX ARE AVAILABLE FOR A SMALL FEE FROM THE POPULATION DIVISION, BUREAU OF ECONOMIC AND BUSINESS RESEARCH. THE ASSUMPTION THAT THE NET EFFECT OF MIGRATION ON THE AGE, RACE, AND SEX COMPONENTS OF A COUNTY'S POPULATION WAS SIMILAR BETWEEN 1970 AND 1978 TO THE CHANGE OBSERVED BETWEEN 1960 AND 1970 IS IMPLICIT IN THE METHODOLOGY USED TO COMPUTE THESE ESTIMATES. THE ACCURACY OF THE ESTIMATES IS DIRECTLY RELATED TO THE DEGREE TO WHICH THIS ASSUMPTION HOLDS FOR A GIVEN COUNTY.

COURTS AND LAW ENFORCEMENT

Data on criminal offenses are subject to certain limitations. Many crimes are not reported to law enforcement agencies and hence are not counted in preparing crime statistics. Victims may report crimes to prosecuting authorities rather than to law enforcement agencies. Others think there is no use in reporting crimes because nothing can be done about them. Still other victims may have shared in such offences as illegal sex acts, gambling, or drug usage.

The principal source of data on crimes and criminals in Florida is the annual report of the State Department of Criminal Law Enforcement, Crime in Florida. Other sources include publications of several divisions of the U.S. Department of Justice: Crime in the United States, by the Federal Bureau of Investigation; National Prisoners Statistics Bulletin: Capital Punishment by the National Criminal Justice Information and Statistics Service; and Expenditure and Employment Data for the Criminal Justice System by the Law Enforcement Assistance Administration.

Data on legal services come from the Florida Bar and the Florida Division of Employment Security, Office of Research and Analysis.

Prison and prisoner information is made available by the Federal Bureau of Prisons of the U.S. Department of Justice in its Statistical Report and the Florida Department of Corrections, Annual Report. Data on the court system is published in the Annual Report of the Judicial Council of the State of Florida.

TABLE 22.04. CRIMINAL OFFENSES: CRIME INDEX OFFENSES BY TYPE OF OFFENSE IN FLORIDA 1975 THROUGH 1978

1/ ACTUAL OFFENSES KNOWN TO LAW ENFORCEMENT OFFICERS, NOT THE NUMBER OF PERSONS WHO COMMITTED THEM OR NUMBER OF INJURIES THEY CAUSED.

2/ INCLUDES MURDER, FORCIBLE RAPE, ROBBERY, AND AGGRAVATED ASSAULT.

3/ INCLUDES BREAKING AND ENTERING (BURGLARY), LARCENY, AND AUTO THEFT.

4/ CLEARANCE OF AN OFFENSE OCCURS WHEN AN OFFENDER IS IDENTIFIED, CHARGED, AND TAKEN INTO CUSTODY, OR OCCASIONALLY WHEN SOME ELEMENT BEYOND LAW ENFORCEMENT CONTROL PRECLUDES FORMAL CHARGES AGAINST THE OFFENDER.

NOTE: DATA ARE AGGREGATES OF OFFENSES REPORTED TO MUNCIPAL, COUNTY, AND STATE LAW ENFORCEMENT AGENCIES AND CAMPUS POLICE DEPARTMENTS.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF CRIMINAL LAW ENFORCEMENT, CRIME IN FLORIDA: 1978 ANNUAL REPORT.

GOVERNMENT FINANCE AND EMPLOYMENT

State and local governments are not only important from political and social viewpoints, but their economic impact is considerable.

A number of tables are new this year and present data from the 1977 Census of Governments conducted by the U.S. Bureau of the Census. Included is information on the activities of local governmental units relating to retirement systems, employment and payroll, sales of ordinary real estate, property tax revenue, and distribution of assessed real properties by type. Many of these data should be useful in appraising the equity of current structures and policies of taxation by local units of government.

The U.S. Bureau of the Census publishes a number of individual reports, including State Government Finances, City Government Finances, Public Employment, City Employment, Finances of Employee-Retirement Systems, Labor-Management Relations in State and Local Governments, and Governmental Finances and Employment. The Bureau of the Census also has published Property Values Subject to Local General Property Taxation, Local Government in Selected Metropolitan Areas and Large Counties, Compendium of Public Employment, and Environmental Quality Control. The U.S. Department of the Treasury publishes Federal Aid to States; the Internal Revenue Service issues the Commissioner's Annual Report; and the U.S. Community Services Administration releases Geographic Distribution of Federal Funds (formerly Federal Outlays).

Official records and reports of the Comptroller of the State of Florida form the basic source of information about government finances in Florida and are published in the Annual Report of the Comptroller. Although the official records of the Comptroller are used by the Bureau of the Census in its compilations on state and local government finances, the Bureau of the Census has found it necessary at times to classify and present the government financial statistics in terms of its own system of uniform concepts and categories rather than according to the diverse terminology and structure of individual governments. This procedure explains the differences which may be found between similar data from the two sources.

Other State of Florida sources of data on government finances and employment include the Department of Administration, which provides data on legislative appropriations and positions provided for during fiscal years 1969-1970 through 1978-1979; the Department of Banking and Finance, Local Government Financial Report; the Department of Revenue, Florida Ad Valorem Valuations and Tax Data; the Department of Business Regultion, for data on parimutuel wagering and beverage licenses; The Report of the State Treasurer; the Division of Employment Security on employment and payrolls; and the Division of Retirement, Annual Report. The Division of State Planning of the Florida Department of Administration published information used in the tables on state rankings of federal aid to states.

A number of tables in the Health, Education, and Cultural Services Section (20.00) contain data on property valuations, revenue, expenditure, and taxes for education by public agencies.

A private nonprofit agency, the Tax Foundation, has kindly permitted the publication of data from its publications.

ECONOMIC INDICATORS AND PRICES

Most of the tables in the Abstract are cross-sectional or "snapshot" portrayals of the situation existing at any one time. Many readers are interested in charting trends over time. This section should help them.

The basic indicator series which is prepared by the Office of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security is presented in Table 24.12. These are the indicators which are brought up-to-date in the publication Economic Indicators.

Sales and sales tax paid is a series that results from the operation of the Department of Revenue of the State of Florida. A source of banking data is the State of Florida, Division of Banking, while data on gross state product come from the Economic Report of the Governor.

Consumer price indexes are the work of the Bureau of Labor Statistics of the U.S. Department of Labor and appear in the Monthly Labor Review, Handbook of Labor Statistics, and in the U.S. Department of Commerce publication Survey of Current Business. The consumer price index (CPI) program was revised beginning January 1977. The Bureau of Labor Statistics now publishes two indexes: a revised index reflecting the buying habits of urban wage earners and clerical workers and a more comprehensive index relfecting the buying habits of all urban households. Both indexes are comparable with historical CPI figures; the index for all urban households is used in tables in this section. This new index is based on information reflecting the buying habits of about 80 percent of the U.S. population and represents all urban residents, including professional workers, the self-employed, the poor, the unemployed, and retired persons. Not included are persons living outside urban areas, farm families, persons in military services, and those in institutions. In addition, the Department of Economics of the University of North Florida in cooperation with the Florida Times-Union has developed a consumer price index for Jacksonville. They have graciously allowed the Florida Statistical Abstract to present it in this section, Table 24.66.

As a part of this new program, the Bureau of Labor Statistics now issues a quarterly CPI for Miami. A publication of the U.S. Bureau of Labor Statistics called News presents the estimates of family budgets for Orlando and other cities and the relative weights of items in the consumer price index.

The series of price indexes formerly called wholesale prices are now designated as producer prices in Table 24.70. According to the Bureau of Labor Statistics, this series measures the average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating the indexes contains nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the agriculture, forestry, fishing, moning, manufacturing, gas, electricity, and all public utility sectors.

Price indexes comparing price levels among Florida counties are prepared and released by the Florida Department of Administration.

Data on price trends in construction will be found in Section 11.00, and indexes of prices received by fishermen in Section 10.00.

(NA) NOT AVAILABLE.

NOTE: THESE SALES WERE REPORTED TO THE DEPARTMENT OF REVENUE FOR THE 4 PERCENT REGULAR SALES TAX, THE 4 PERCENT USE TAX, AND THE 3 PERCENT VEHICLE AND FARM EQUIPMENT SALES TAX FROM JANUARY TO DECEMBER OF EACH YEAR. THE SALES OCCURRED, FOR THE MOST PART, FROM DECEMBER OF THE PREVIOUS YEAR THROUGH NOVEMBER OF THE POSTED YEAR. THESE DATA ARE NOT COMPARABLE WITH RETAIL SALES FIGURES REPORTED BY THE BUREAU OF THE CENSUS OR THOSE ESTIMATED BY THIS BUREAU PRIOR TO 1970 BECAUSE OF DIFFERENCE IN DEFINITIONS OF RETAILERS AND RETAIL SALES. IN JULY 1967, CHANGES WERE MADE IN THE LAW WHICH INCREASED THE NUMBER OF KINDS OF ITEMS SUBJECT TO SALES TAXES.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF REVENUE, SALES TAX TOTALS BY KIND FOR CALENDAR YEAR ENDING DECEMBER 31, 1978, AND PREVIOUS EDITIONS.

TABLE 24.40. GROSS STATE PRODUCT: ESTIMATES BY BROAD INDUSTRIAL SOURCE IN FLORIDA 1973 THROUGH 1977

(ROUNDED TO MILLIONS OF DOLLARS)

INDUSTRY	1973	1974	1975	1976	1977 A/

NOTE: THE FLORIDA PRICE LEVEL INDEX IS A SET OF NUMBERS WHICH REFLECTS THE PRICE LEVEL IN EACH COUNTY RELATIVE TO A POPULATION-WEIGHTED STATEWIDE AVERAGE (100) FOR A PARTICULAR POINT IN TIME, OCTOBER 1978. IT MEASURES PRICE LEVEL DIFFERENCES FROM PLACE TO PLACE IN CONTRAST TO THE CONSUMER PRICE INDEX PREPARED BY THE U.S. BUREAU OF LABOR STATISTICS, WHICH MEASURES PRICE LEVEL CHANGES FROM MONTH TO MONTH. THE BASIS FOR THESE COMPARISONS IS ONE FIXED STANDARD OF LIVING WHICH REPRESENTS THE CONSUMPTION PATTERNS OF A TYPICAL WAGE EARNER OR CLERICAL WORKER. THE INDEX MEASURES IN EACH COUNTY THE RELATIVE COST OF LIVING BY THIS STANDARD.

QUALITY OF LIFE

The quality of life is a highly abstract concept that cannot be measured directly. However, by defining those factors that determine the quality of life and measuring the corresponding social indicators, comparisons of the quality of life in different places may be made. Furthermore, by updating these measures from time to time, progress or regress in the conditions of living in one area may be computed.

Traditionally, it has been assumed that the only sound indicators of any value were such measures of economic prowess as gross national product or personal income. But in today's highly complex society there are many characteristics of the environment that the affluent can change no more easily than those with fewer financial resources. A list of both economic and noneconomic factors that most people would accept as representing determinants of the quality of life can be classified by such broad categories as community living conditions, personal achievements, and environmental factors. Within these sections specific indicators are grouped into such divisions as health, education, income, employment, welfare, climate, economic conditions, public safety, governmental environment, and the health and cultural environments.

In Table 25.01 indicators were selected to permit the reader to compare the quality of life in Florida with that in other states in the Sunbelt and with other populous states in other sections of the country. In Table 25.02 are indicators of the relative quality of living in one or another of the standard metropolitan statistical areas within the state (SMSAs). See the front of the book for a map and the introduction to Section 1.00 for a discussion of SMSAs.

Those interested in comparing Florida with all fifty states or in determining how the metropolitan areas here fit into the national picture are referred to the following publications: (1) U.S. Office of Federal Statistical Policy and Standards and U.S. Bureau of the Census, Social Indicators, 1976; (2) U.S. Environmental Protection Agency, Washington Environmental Research Center, Quality of Life Indicators in U.S. Metropolitan Areas, 1970; (3) Ben-Chieh Liu, The Quality of Life in the United States, 1970; and (4) Quality of Life Indicators in the U.S. Metropolitan Areas, 1970. Item 1 is obtainable from the U.S. Government Printing Office, item 2 from the source indicated, and items 3 and 4 from the Midwest Research Institute, 425 Volker Boulevard, Kansas City, Missouri 64110.

GUIDE TO SOURCES OF STATISTICS

The Florida Statistical Abstract is an abstract. It presents as much statistical information as possible in tabular form, but it is also a guide book to the sources from which the statistics have been taken. In almost every instance more detail exists in the source than can be included in the Abstract, and sometimes the issuing agency has additional data or perhaps more recent information by the time Abstract reaches the user. Where does the user find the sources used in this abstract? Most of them are as close as the telephone or the nearest library.

State sources. Most of the state publications are available free of charge from the agency which issues the report. Supplies are freqently limited and sometimes requests cannot be honored unless they come from other state agencies. The state has a system of state depository libraries, coordinated by the Division of Library Services, Florida Department of State, R.A. Gray Building, Tallahassee 32304. All state agency publications are supposed to be on file in depository libraries or available for interlibrary loan. The reference departments of most libraries are willing to answer questions about data in these publications if the requests are not too time-consuming. The Florida Division of State Library Services issues a monthly and annual summary of state agency publications called Florida Public Documents.

Depository libraries of the State of Florida include the public libraries of Bay and Broward counties, Cocoa, Jacksonville, Miami Beach, Miami, Ocala, Orlando, St. Petersburg, Tampa, and West Palm Beach. University libraries designated as depositories are those at Florida Atlantic, Florida International, Florida Technological, Florida State, Stetson, Jacksonville, Florida (Gainesville), Miami, North Florida, South Florida, and West Florida universities. The library at Miami-Dade Community College and the State of Florida Library in the R.A. Gray Building in Tallahassee also are depositories.

Federal sources. Some federal reports are available without charge from the agency which issues the information, but most federal publications must be purchased from the Government Printing Office (GPO), Washington, D.C. 20402 (phone 202/783-3238) or from a local Government Printing Office bookstore. Publications purchased from the GPO must be paid for in advance. The Statistical Abstract of the United States is similar in purpose to the Florida Statistical Abstract. Readers who are interested in information about the nation, its regions, and states are referred to it.

The federal government also maintains a system of depository libraries in all 50 states, usually the same libraries as state depositories. The University of Florida is designated as a regional depository library and is required to receive and retain one copy of all depository government publications made available to depository libraries either in printed or microfacsimile form. The other libraries in Florida are allowed to select the classes of publications best suited to the interest of their particular clientele. Most libraries would probably be interested in input from users in their local areas about the government publications they should order.

Computer tapes. All tables in the Abstract were prepared by using a computer. The data are available for direct access. Information can be obtained from the Bureau of Economic and Business Research.

The Florida information service of the University of Florida Library in Gainesville maintains an extensive collection of information of and about Florida in books, in files, and on computer tapes. All the data from the population, housing and economic censuses can be accessed from their computer tapes. For information call the library.

Bureau publications. The Bureau of Economic and Business Research can supply a variety of detailed information about Florida.

Population estimates for the state and its minor civil districts are made each year and published in Florida Estimates of Population. Four times a year Population Studies is issued which provides such information as forecasts, age, race, and sex components, and housing.

Building Permit Activity is a monthly compilation of permits issued by municipal and county issuing agencies throughout the state.

Gross and taxable sales data by type of outlet and by county are supplied to the Bureau by the Department of Revenue of the State of Florida. These data can be supplied to interested persons.

The Bureau also publishes The Florida Outlook (a quarterly forecast of the Florida economy), Business and Economic Dimensions, Economic Leaflets, and Florida Economic Indicators.

For prices and rates of these publications and services contact the Bureau of Economic and Business Research of the University of Florida, Gainesville, FL 32611.
